DESCRIPTION.

Tribond 1082 is a fast setting PVA for bonding paper and board materials. Tribond 1082 has a high tack nature providing quick grab properties to substrates. The fast setting nature allows increased production speeds without loss of performance. The viscosity of this product makes it suitable for most applications whether it is applied by hand or machine extruded. Tribond 1082 is suitable for litho and solid board laminating, tube winding, box making, mounting and many other applications.

Users should evaluate the product to make sure all requirements are satisfied before going in to full production.

STORAGE.

Store at temperature above 7°C to prevent damage by frost.
The storage life of this product is 3 months from date of manufacture.

HEALTH AND SAFETY.

None hazardous

Refer to the Material Safety Data Sheet for more information.

CAUTION.

This product has been manufactured to current quality and production specifications. Users of this product must carry out their own trials to ensure all requirements are satisfied. Trillium cannot guarantee the products suitability for the specific purpose of the customer due to the many factors that may affect storage, processing and application.
