DESCRIPTION.

Tribond 1093 is a very fast setting copolymer emulsion for use through jetting application equipment. Tribond 1093 has a high tack and is clean running. Other properties include excellent heat and creep resistance. Tribond 1093 is suitable for bonding cellulosic and some lacquered surfaces. Customers are requested to check the adhesion performance before going in to full production. Bonds should be made and left 24 hours before assessment.

Users should evaluate the product to make sure all requirements are satisfied before going in to full production.

STORAGE.

Store at temperature above 7°C to prevent damage by frost.
The storage life of this product is 3 months from date of manufacture.

HEALTH AND SAFETY.

None hazardous
Refer to the Material Safety Data Sheet for more information.

CAUTION.

This product has been manufactured to current quality and production specifications. Users of this product must carry out their own trials to ensure all requirements are satisfied. Trillium cannot guarantee the products suitability for the specific purpose of the customer due to the many factors that may affect storage, processing and application.
