DESCRIPTION.

Tribond 1138T is a soft, high solids cold seal adhesive for the packaging industry. Designed for use on simple substrates, Tribond 1138T gives a 'leggy' seal or bond. Bonds can be made wet or dry, however, if dry bonds are to be made, two coated surfaces of latex must come into direct contact with each other. Tribond 1138T will only bond to itself in the dry state and thus provides excellent non blocking properties allowing coated items to be stacked.

These properties allow Tribond 1138T to be used as a fugitive adhesive for product placements in magazines and other publications.

Users should evaluate the product to make sure all requirements are satisfied before going in to full production.

STORAGE.

Store at temperature above 7°C to prevent damage by frost.
The storage life of this product is 3 months from date of manufacture.

HEALTH AND SAFETY.

None hazardous
Refer to the Material Safety Data Sheet for more information.

CAUTION.

This product has been manufactured to current quality and production specifications. Users of this product must carry out their own trials to ensure all requirements are satisfied. Trillium cannot guarantee the products suitability for the specific purpose of the customer due to the many factors that may affect storage, processing and application.
