DESCRIPTION.

Tribond 1186HV is a high viscosity, fast setting PVA for bonding filter media and board materials. Tribond 1186HV has a high tack nature providing quick grab properties to substrates and the fast setting nature allows increased production speeds without loss of performance. The viscosity of this product makes it suitable for most roller and hand applications, especially where reduced flow is required e.g. in filter construction. Tribond 1186HV is also suitable for laminating, tube winding, box making, and mounting.

Users should evaluate the product to make sure all requirements are satisfied before going in to full production.

STORAGE.

Store at temperature above 7°C to prevent damage by frost.
The storage life of this product is 3 months from date of manufacture.

HEALTH AND SAFETY.

None hazardous
Refer to the Material Safety Data Sheet for more information.

CAUTION.

This product has been manufactured to current quality and production specifications. Users of this product must carry out their own trials to ensure all requirements are satisfied. Trillium cannot guarantee the products suitability for the specific purpose of the customer due to the many factors that may affect storage, processing and application.
