DESCRIPTION.

Tribond 1189MH is a long open time, high tack adhesive for laminating paper and board materials. The viscosity of this product makes it suitable for most roller applications. Tribond 1189MH is primarily used in the laminating and tube winding industries although it can be used for the lamination of aluminium foils and carton construction.

Users should evaluate the product to make sure all requirements are satisfied before going in to full production.

STORAGE.

Store at temperature above 7°C to prevent damage by frost.
The storage life of this product is 3 months from date of manufacture.

HEALTH AND SAFETY.

None hazardous
Refer to the Material Safety Data Sheet for more information.

CAUTION.

This product has been manufactured to current quality and production specifications. Users of this product must carry out their own trials to ensure all requirements are satisfied. Trillium cannot guarantee the products suitability for the specific purpose of the customer due to the many factors that may affect storage, processing and application.
